

CEP HOURS CLAIMED

Claiming completed CEP hours is a requirement of LPNs in Saskatchewan. During the online renewal process, LPNs are asked to report the credits hours earned with each educational opportunity completed. This reporting may be easier to do for some educational opportunities than others. Although there are estimated hour guidelines for various options posted on the SALPN website, **LPNs may consider claiming 'real-time' spent for each self-directed learning opportunity completed.** The hour guidelines posted on the SALPN website is an estimate of likely time required and will help LPNs choose options and plan their time accordingly. This means LPNs may claim more or less than the posted time.

LPNs should keep track of real-time spent completing education for reporting purposes and be prepared to speak to or explain reported time in the random audit process. As self-regulated professionals, LPNs are obligated to report truthfully.

If you have completed your online renewal and wish to adjust the reported credits earned for a specific individual learning opportunity, please email info@salpn.com.

The SALPN will make every effort to maintain reasonably accurate estimates of time required on the SALPN website. We apologize for any confusion and are continuously looking to improve communication efforts regarding the CEP program.
